No. 1554 of 1893.

From

The INSPECTOR-GENERAL of PRISONS,
Bombay Presidency;

To

The SECRETARY to GOVERNMENT,
Judicial Department,
Bombay.

Inspector-General of Prisons' Office,
Bombay, 13th April 1893.

Sir,

I have the honour to submit the Annual Report, together with the usual statistical tables, on the jails in the Bombay Presidency for the year 1892. For three months of the past year from July 9th to October 10th, during which I was absent on privilege leave, Surgeon Lieutenant-Colonel Salaman officiated as Inspector-General of Prisons.

JUDICIAL.

General summary.

2. The summary which is to be found in the appendix shows that the total population in jails and lock-ups during the year under review was 60,485 as compared with 61,137 in the preceding year—a decrease of 652; while the daily average population has risen from 7,799 in 1891 to 8,022 in 1892..

Statement No. I.—Number and disposal of convicts.

3. This statement deals with convicted prisoners only and a summary of it is given below :—

		1891.			1892.		
		Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on last day of previous year.	Central and District Jails...	6,429	228	6,657	6,674	225	6,899
	Subordinate Jails	184	7	191	203	12	215
Imprisoned during the year.	Central and District Jails ..	12,142	562	12,704	12,274	634	12,908
	Subordinate Jails	3,018	209	3,227	3,096	205	3,301
Total ...	Central and District Jails...	18,571	790	19,361	18,948	859	19,807
	Subordinate Jails	3,202	216	3,418	3,299	217	3,516
Grand Total ...		21,773	1,006	22,779	22,247	1,076	22,323
Daily average number ..		6,755	221	6,976	6,981	247	7,228

4. The subjoined table shows that there has been an increase in the number of direct admissions into Central and District Jails :—

		1891.	1892.	Increase.	Decrease.	Total Increase or Decrease in each Province.
Bombay	Common Jail	2,114	1,875	...	239	—179
	House of Correction ...	466	526	60	...	
Deccan	Yerrowda	603	749	146	...	
	Násik	402	476	74	...	
	Dhulia	670	593	...	77	+166
Southern Marátha Country.	Bijápur	474	468	...	6	
	Deccan Gang	...	...	...	...	
	Dhárwár	442	471	29	...	
	Kárwár	129	156	27	...	
Konkan	Ratnágiri	174	176	2	...	+216
	Thána	1,077	1,264	187	...	
Gujarát	Ahmedabad	975	913	...	62	
	Dhuliákot	3	...	...	3	
	Kaira...	858	703	...	155	—54
	Surat...	467	623	156	...	
	Rájkot	90	100	10	...	
Sind	Karáchi	637	757	120	...	
	Hyderabad	1,188	1,235	47	...	+16
	Shikárpur	1,404	1,290	...	114	
	Nára Convict Gang ...	276	239	...	37	
Aden	Aden	255	294	39	...	+39
	Total ...	12,704	12,908	897	693	
	Increase ...			204		

5. In the Jails of Yerrowda and Thána no special cause has been assigned for the increase; in the Surat Jail it has been attributed to a larger number of convictions under the Salt and Abkári Acts; in the Karáchi Jail the increase is due to a larger number of convictions for assault and for gambling, and for breaches of the Salt Act; and in the Aden Jail the increase in the admissions is attributable to minor offences and convictions under the Arms and Shipping Acts. The decrease in the numbers admitted into the Common Jail and the Shikárpur Jail appears somewhat difficult to explain, while the fall in admissions into the Kaira Jail is ascribed to the rainfall of 1892 having been more favourable than that of the preceding year.

Female prisoners.

6. There has been an increase of 68 in the number of females imprisoned during the year under report as compared with 1891:—

	1888.	1889.	1890.	1891.	1892.
Females	877	882	786	771	839
Decrease on previous year per cent. ...	...	...	10·9	1·9	...

7. The Common Jail shows an increase of 29 female admissions and Yerrowda Jail one of 32. In Aden the number of female prisoners admitted has risen from 4 in 1891 to 16 in 1892, and in Rájkot from 2 to 16.

8. The statement below shows the number and disposal of convicted prisoners during the past two years:—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Transferred to other jails—						
To undergo sentence	3,395	74	3,469	3,058	84	3,142
For transportation beyond seas, &c.	141	8	149	69	10	79
Released on appeal	880	34	914	828	37	865
Do. on expiry of sentence ...	12,817	696	13,513	13,278	753	14,031
Do. under Remission Rules ...	763	24	787	745	20	765
Do. by order of Government on account of sickness ...	3	...	3	4	...	4
Do. on other grounds ...	2	...	2	8	...	8
Transported beyond seas ...	119	7	126	91	21	112
Transferred to lunatic asylums ...	6	2	8	3	...	3
Escaped	21	...	21	14	...	14
Executed	36	2	38	25	...	25
Died	231	4	235	263	1	264
Number remaining on 31st December.	6,877	237	7,114	6,961	246	7,207
Total ...	25,291	1,088	26,379	25,347	1,172	26,519

9. The decrease in the number of transfers is mainly due to the Nára Gang not having been maintained at its normal strength owing to frequent shifts of camp during the year. The number of prisoners released on account of sickness during the past year has been four, two of such releases having been from the Common Jail, one from the House of Correction, and one from the Ahmedabad Jail. Of the eight

Government Resolution No. 6139, dated 15th November 1892.
Government Resolution No. 627, dated 2nd February 1892.
Government Resolution No. 6463, dated 17th November 1892.
Government Resolution No. 6089, dated 1st November 1892.

prisoners released on other grounds two were Europeans who were released shortly before the termination of their sentences to admit of their taking advantage of passages provided for them to England; one was a recovered lunatic; one was set free on the ground of clemency; one was handed over to Political Agent, Quetta and Pishin; one was enlarged for assisting in the capture of a run-away convict; one was released for rendering assistance to a warder who when in charge of an extramural party was attacked with cholera; and one was discharged on 17th December 1892 from the Aden Jail under the orders of Government conveyed to the Superintendent of the Aden Jail by the First Assistant Resident, Aden.

Government Resolution No. 2096, dated 18th April 1892.
Government Resolution No. 2278, dated 27th April 1892.
Government Resolution No. 7029, dated 30th December 1891.
Government Resolution No. 3559, dated 1st July 1892.
Government Resolution No. 265, dated 15th January 1892.
Government Resolution No. 293, dated 14th January 1892.
Government Resolution No. 7219, dated 17th December 1892.

One hundred and twelve prisoners have been transported against 126 in the previous year. The number of females transported shows an increase, and this is due in a great measure to the rules regarding the deportation of female prisoners having been relaxed. The three lunatics transferred to asylums were sent, one from the House of Correction and two from the Shikárpur Jail. Fourteen prisoners of those who escaped during 1892 were still at large at the close of the year against 21 similar cases at the close of 1891. The number of executions has been 25 against 38 in the previous year. No females have been executed during the year under report. The number of deaths shows an increase over the figures for the year 1891. There remained in the jails on the last day of the year 6,961 males and 246 females. Of the former 164 were Burmese.

10. The classification according to religion of convicts admitted into jail shows that out of 16,209 admissions, 314 or 1·9 per cent. have been Christians, 5,760 or 35·5 per cent. Mahomedans, and 10,013 or 62 per cent. Hindus. Buddhists and Jains have numbered 45 or 0·3 per cent., and all other classes 47 or 0·3 per cent. In this last figure are included 33 Párs, 13 Jews, and 1 West Indian.

Statement No. II.—Religion, age, and previous occupation.

11. The number of juveniles admitted during the year has been 111; of this number 91 were males and 20 females. The admissions have been less by 12 than those recorded in the previous year. Of the 91 male juveniles admitted 7 had been previously convicted; 30 were sentenced to terms of imprisonment for one month and under; 20 were under sentence of above one and under six months; and 41 were under sentences of above six months.

Juveniles.

12. The table which follows shows the occupation of convicts previous to imprisonment and contains the figures of the free population according to the last census. The percentage of avocations is about the same as in 1891 and calls for no special remark, if regard be had to the fact that the ratio appearing in column 4 for 1891, which is taken from the report of this department for that year, is calculated on the figures of the census for 1881:—

	1891.				1892.			
	Census (1881).	Number admitted during the year.	Percentage of number admitted to Free Population.	Percentage to Total Prisoners admitted.	Census (1891).	Number admitted during the year.	Percentage of number admitted to Free Population.	Percentage to Total Prisoners admitted.
Employed under Government or Municipal or other local authorities	214,603	499	0·233	3·3	378,041	477	0·126	3·1
Professional persons	46,994	178	0·379	1·2	219,603	213	0·097	1·4
In service or performing personal offices	146,634	2,041	1·392	13·5	264,859	2,121	0·801	13·8
Engaged in agriculture or with animals	3,400,963	8,170	0·240	53·9	5,752,769	8,168	0·142	53·2
Engaged in commerce or trade ...	199,696	1,181	0·591	7·8	4,56,657	1,189	0·260	7·7
Mechanical arts, manufactures and engineering operations ...	958,068	1,005	0·105	6·6	2,078,026	1,355	0·065	8·8
Miscellaneous	3,553,495	2,086	0·059	13·7	644,026	1,847	0·287	12·0
Total ..	8,520,453	15,160	0·178	100·0	9,793,981	15,370	0·157	100·0

13. The number of males received into Central, District and Subordinate Jails during the year 1881 was 21,307 or 0·25 per cent. of the free population. In 1892 the figures have been 23,882 or 0·24 per cent. This decrease in percentage appears small, but it must be remembered that in 1881 the facilities for removing prisoners from lock-ups to jails were not so great as they now are, and consequently many of the prisoners sentenced in the past year to limited periods of incarceration, who would, if so sentenced in 1881, have served out their terms of imprisonment in lock-ups, figure in the returns for Central, District and Subordinate Jails.

Statement No. III.—Nature and length of sentence.

14. The table which follows compares the sentences of the convicts admitted into the jails during 1891 and 1892 :—

		Not exceeding 1 month.	Above 1 and not exceeding 3 months.	Above 3 and not exceeding 6 months.	Above 6 months and not exceeding 1 year.	Above 1 year and not exceeding 2 years.	Above 2 years and not exceeding 5 years.	Above 5 years and not exceeding 10 years.	Exceeding 10 years.	Sentenced to Transportation.		Sentenced to death.	Total.
										For life.	For a term.		
	1891 ...	6,004	3,139	3,107	1,790	869	550	227	14	125	47	59	15,931
	1892 ...	6,110	3,523	2,925	1,843	856	593	133	25	123	26	52	16,209
Ratio per cent. to number admitted direct into jail ...	1891 ...	37·7	19·7	19·5	11·2	5·5	3·4	1·4	0·1	0·8	0·3	0·4	100·
	1892 ...	37·7	21·7	18·0	11·4	5·3	3·7	0·8	0·1	0·8	0·2	0·3	100·

15. There has been a substantial increase in the number of sentences from one to three months. In the matter of ratio under the remaining heads the variation, where any appears, is but slight. The number sentenced to death has been less by 7 than in the preceding year.

16. As regards the nature of the imprisonment awarded the subjoined table exhibits a large decrease under the head "Simple imprisonment," while the other heads all show an increase. The number of those awarded sentences of rigorous imprisonment with solitary confinement has, it may be noted here, increased from 17 in 1890 to 83 in 1892 :—

	1891.	1892.
Sentence of simple imprisonment	1,107	921
Do. rigorous imprisonment	14,713	15,106
Do. do. with solitary confinement	36	83
Do. do. with whipping	75	99
Total ...	15,931	16,209

Statement No. IV.—Re-convictions.

17. Of 2,258 previously convicted prisoners admitted into Central and District Jails during the past year, 1,662 have been identified before trial as against 1,514 in 1891. The advance is substantial and satisfactory. In addition to the information to be gathered from the table which follows it may be stated that the number of prisoners classified by Courts on conviction, as "habituals" has risen from 651 in 1891 to 1,015 in the past year, while the number of prisoners classified, after conviction, as "habituals" on a reference from the jail authorities has been 166 in the later against 270 in the earlier period, making a total under both heads of 1,181 classifications of the nature indicated in 1892 against 921 such classifications in 1891 :—

1	2	3	4	5	6	7
Number.	Jails.	Number of convicts admitted during the year.	Number of convicts in column 3 identified as habitual offenders before conviction, and whose previous convictions did not so appear in the record of proceedings at the trial.	Number of convicts in column 3 not so identified and whose previous convictions did not so appear, but who were after arrival in jail identified by Jail officials as having been previously convicted.	Number of prisoners who confessed themselves to be habituals.	Total number of habituals.

	Total, 1892 ...	12,908	1,662	563	33	2,258
	Total, 1891 ...	12,704	1,514	641	47	2,202

Statement No. V.—Escapes and recaptures.

18. A reference to this statement will show that the number of escapes has been the same as in 1891—28, but the number recaptured, 27, has been more than double that of the earlier year. The Hyderabad Jail is responsible for ten out of the whole number. Three out of the ten escapes from the Hyderabad Jail occurred from inside the jail and were due to the laxity, and possibly the connivance, of some of the warder staff. The warders who were responsible were prosecuted and punished. The warder establishment of the Hyderabad Jail I am far from regarding as being, taken all round, a satisfactory body. There is often great difficulty in obtaining men to fill up vacancies in the Hyderabad establishment, and such material as is forthcoming is only too frequently of an inferior description. When the new Central Jail at that station is completed a thorough re-organization of the present Hyderabad warder staff—a matter to which in anticipation of the above event I am already turning my attention—must needs be carried out. With the attractions in the shape of the excellent free quarters afforded by the warder lines of the new Central Jail; with those offered by the increase in the pay of the lower grade warders—a measure recommended by the Poona Jail Committee of 1890, and which I trust may ere long be finally sanctioned—and with the further attractions afforded by the creation of three Head Warders' appointments with pay appreciably in excess of that drawn by any present member of the Hyderabad warder staff, I am hopeful of being able to obtain a better class of man for the warder establishment at Hyderabad than is now forthcoming, and of being able to improve—and the escape figures given above show that in this connection there is considerable room for improvement—the discipline of the jail of the station under reference. The other escapes from the District Jails were effected from extramural parties belonging to those jails. With the exception of one case, where four prisoners belonging to the Hyderabad Jail contrived to make off when a heavy dust storm accompanied by

torrents of rain suddenly overtook the party of convicts to which they were attached, the remaining escapes have been of an ordinary character and appear to call for no special comment. Six out of the 28 escapes have occurred from Subordinate Jails. It will perhaps not be out of place to say here that to duly impress upon the jail warder staff the responsibility which attaches to them when charged with the custody of prisoners, the jailors of the several jails weekly read out to the subordinate members of the establishment the punishment to which the latter are liable if they negligently allow a prisoner in their charge to escape.

Statement No. VI.—Offences and punishments.

19. This statement shows the offences committed by convicts in jail and the punishments inflicted on them. There has been an increase in the total number of punishments of 5·3 per cent. :—

	1891.	1892.
Criminal offences ...	24	33
Smoking and possession of forbidden articles	705	786
Offences relating to work	1,877	2,158
Other offences...	1,262	1,413
Total ...	3,868	4,390

20. The number of criminal offences has been 33 against 24 in 1891. These for the most part have consisted of escapes and attempts to escape, while there have been two cases of assault and one of murder. The latter occurred in the Surat Jail when a prisoner struck a fellow convict on the head with a portion of a factory loom and killed him. The former was sentenced to death and hanged. A large increase appears in the number of offences relating to work in the jails of Yerrowda, Thána and Shikárpur. The increase in the daily average population accounts in a measure for the increase in the total number of punishments.

21. The punishments inflicted in the two years have been as follows :—

	1891.	1892.
By Criminal Courts	24	33
Solitary confinement	17	27
Reduced diet	42	73
Solitary confinement with reduced diet.	729	529
Other punishments	2,948	3,627
Corporal punishments	108	101
Total ...	3,868	4,390

22. The punishment of " Solitary confinement with reduced diet " has not been so frequently resorted to as in 1891 in the Common Jail, the House of Correction and the Yerrowda Jail. The number shown under " Other punishments " exhibits an increase and consists of deduction of marks 563, stocks 2,369, reduction of convict warders 54, shot drill 122, and warnings and other punishments of a trivial nature 519. The number of corporal punishments has been less by 7 than the preceding year, and the ratio of this class of punishment to other jail punishments has fallen from 2·9 in 1891 to 2·4 in the year under review. The corporal punishments in the jail at Hyderabad numbered 19 in the year 1891 and have been 4 in the year 1892. The table giving particulars as to the number of stripes inflicted is given below :—

	1	2	3						4	5	6	
			Total Number of Prisoners punished by whipping.								Number of Prisoners in whose case (a) Death or (b) Illness was directly or indirectly the effect of Corporal Punishment.	
	Total number of Male Prisoners for the year.	Total number of Jail offences.	5 to 10 stripes.	Above 10 to 15.	Above 15 to 20.	Above 20 to 25.	Above 25 to 30.	Grand Total.	Percentage of Column 3 to Column 1.	Percentage of Column 3 to Column 2.	(a) Death.	(b) Illness.
Total .. 1891	19,480	3,734	6	19	20	62	1	108	0·55	2·9	..	..
Total .. 1892	*19,835	4,282	3	24	23	49	..	99	0·5	2·3	..	..

*The total excludes the number moved from jail to jail within the province.

Imposition of fetters.

23. Subjoined is the usual statement showing the number of cases in which fetters have been imposed during the year. The number in the preceding year was 8,514. The jail of Hyderabad, (a large proportion of the population of which has been employed on the works of the new Central Jail at that station in an open situation instead of, as ordinarily, on canal clearance operations in the neighbourhood of jungle) shows a very large decrease in the number of prisoners fettered in 1892 as compared with 1891. The condemned prisoners in the Shikárpur Jail are not now fettered, as the alterations to the cells at Shikárpur, in which this class of prisoner is confined, referred to in the report for the year 1891, have now been carried out.

	Total number of convicts confined.		Number of Cases in which Fetters were not imposed or worn.		Number of Cases in which Fetters were imposed or worn.		Length of time for which Fetters were imposed or worn.											
							Under 1 month.		1 to 3 months.		3 to 6 months.		6 to 12 months.		Over 12 months.		Total.	
	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.	M.	F.
Total ...	22,046	955	14,844	955	7,202	...	1,115	...	1,787	...	1,408	...	1,238	...	1,654	...	7,202	...

Appendix C.—Mark system.

24. The number of prisoners on the mark rolls released during the year has been 765, a decrease of 22 on the number for 1891. Fifteen prisoners owing to misconduct have failed to gain any remission, 2 at Yerrowda, 1 at Dhulia, 2 at the Deccan Gang, 1 at Ratnágiri, 2 at Thána, 2 at Ahmedabad, 3 at Hyderabad, and 2 in the Nára Convict Gang:—

	1888.	1889.	1890.	1891.	1892.
Number on mark rolls released ...	657	670	689	787	765
Percentage of the number on mark rolls released to the number under sentence of 2 years and upwards	99·4	98·8	98·7	98·7	98·1

Statement No. VII.—Education.

25. The figures in this statement deal with the education of convicts while in jail and are not of much interest, as such education is now imparted in only four jails, Yerrowda, Kárwár, Thána and Surat, Bijápur having, in this connection, dropped out of the list during the year under report.

Statement No. VIII.—Convict officers.

26. With a daily average population of 6,806 males and 233 females, 527 males and 9 females have been employed as convict officers. This number is less than in the previous year, the figures for which were respectively 544 and 15. The ratio per cent. of male and female convict warders to daily average strength has been practically the same in 1892 as in 1891. The number of punishments exhibits an increase of nine on the previous year, having risen from 225 to 234. While on the subject of convict officers it may be as well to mention that the system of guarding and patrolling the sleeping wards during the night by convicts termed "night watchmen" has been introduced into several of the large jails and is gradually being extended. This system has been in force for many years in some of the sister Jail Departments of India. Having had an opportunity of looking into its working in some of the jails on the other side of India when attending the Calcutta Jail Conference in 1892, I am entirely in favour of the arrangements, and in this connection it is only right that I should state that to Surgeon Lieutenant-Colonel Salaman, who held the appointment of Inspector-General of Prisons during my absence on privilege leave for three months in the past year, belongs the credit of having introduced the system under reference into our jails as above.

Statement No. IX.—Diet.

27. No change of any importance has been made in the diet scales throughout the year under report, but an alteration has been made in the distribution of the daily allowance.

Formerly the prisoners used to receive two meals a day ; now, however, an early morning meal is issued to them before they start work. It may not be out of place here to state that the cultivation of lime trees is being extended in the case of those jails that have gardens attached to them.

Statement No. XIX.—Under-trial prisoners, District Jails.

28. The table which follows is an abstract of Statement XIX and shows the number and disposal of under-trial prisoners during the years 1891 and 1892 :—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Number remaining at close of previous year	242	5	247	193	11	204
Number received during the year.	3,335	136	3,471	3,013	125	3,138
Total population ...	3,577	141	3,718	3,206.	136	3,342
Released during the year ...	1,483	60	1,543	1,528	62	1,590
Convicted and sentenced ...	1,742	66	1,808	1,430	62	1,492
Transferred	154	4	158	89	2	91
Escaped	...	...	...	...	...	...
Died	5	...	5	9	...	9
Remaining on 31st December ...	193	11	204	150	10	160
Daily average number ...	193	5	198	169	4	173

29. The number of under-trial prisoners admitted during the year shows a decrease of 333 when compared with the admissions for 1891. The daily average number in confinement has been 173 against 198 in the previous year. The number released has been 1,590 or 50·7 per cent. of the total number admitted, and the number convicted and sentenced has been 1,492 or 47·5 per cent. In 1891 the number released was 44·4 per cent. and the number convicted 52·1 per cent. Nine under-trial prisoners died in the District Jails during the year. Of these 6 died at Shikárpur, 1 at Dhárwár, 1 at Ahmedabad and 1 at Karáchi. The number remaining at the close of the year was 160.

Subordinate Jails and Lock-ups.

30. The following table shows the number of under-trial prisoners admitted into subordinate jails and lock-ups during the year and the number remaining at the close of the year :—

	Subordinate Jails.			Lock-ups.			Total.
	Males.	Females.	Total.	Males.	Females.	Total.	
Number remaining at close of previous year	69	5	74	401	10	411	485
Number received	2,399	115	2,514	26,191	1,434	27,625	30,139
Total ...	2,468	120	2,588	26,592	1,444	28,036	30,624
Released	813	52	865	6,445	453	6,898	7,763
Convicted and sentenced ...	1,147	52	1,199	12,879	700	13,579	14,778
Transferred	400	13	413	6,852	278	7,130	7,543
Escaped	4	...	4	13	...	13	17
Died	5	1	6	14	...	14	20
Remaining on 31st December ...	99	2	101	389	13	402	503
Daily average number	95	2	97	506	18	524	621

31. The number of admissions into subordinate jails and lock-ups has been less by 399 than in the previous year. During the year under report the total number of releases has been 7,763, of convictions 14,778, of escapes 17 (6 from subordinate jails and 11 from lock-ups), and of deaths 20; the figures for 1891 having been releases 8,461, convictions 14,475, escapes 1, and deaths 13. The daily average number of prisoners confined has been 621, or 4 less than in the previous year. Of the 6 deaths in the subordinate jails there have occurred in the districts of Thar and Párkar 1, Panch Maháls 2, Broach 1, Kolába 1, and Deesa 1 (a female). Of the deaths in the lock-ups there have taken place in the district of Shikárpur 4, Hyderabad 1, Karáchi 1, Kaira 1, Broach 1, Surat 1, Poona 1, Khándesh 1, Násik 1, and Dhárwár 2.

Convicts—Subordinate Jails.

32. The subjoined table shows the number remaining on the last day of the year, the number admitted, and the disposal of convicted prisoners in the subordinate jails during the years 1891 and 1892:—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Number remaining on 31st December	184	7	191	203	12	215
Imprisoned during the year ...	3,018	209	3,227	3,096	205	3,301
Total ...	3,202	216	3,418	3,299	217	3,516
Received from other jails to undergo sentence	5	...	5	2	...	2
Received on transit to other jails.	...	...	...	...	...	...
Grand Total ...	3,207	216	3,423	3,301	217	3,518
Transferred to other jails ...	890	52	942	888	40	928
Released—						
On appeal	109	6	115	120	8	128
On expiry of sentence... ...	2,001	144	2,145	2,051	155	2,206
Under Remission Rules ...	...	...	...	...	...	...
By order of Government ...	...	...	...	1	...	1
Transferred to lunatic asylum ...	...	1	1	...	...	...
Escaped	...	...	...	2	...	2
Executed	4	1	5	8	...	8
Died	...	...	...	1	...	1
Remaining on 31st December ...	203	12	215	230	14	244
Total ...	3,207	216	3,423	3,301	217	3,518
Daily average strength ...	176	11	187	175	14	189

33. The figures in the above statement show that there has been a small increase in the number of male convicts and a very small decrease in the number of female convicts imprisoned during the year as compared with the year 1891. The total daily average strength has been 189 or 2 over the previous year. The prisoner shown as released by order of Government is referred to in paragraph 9 of this report and was confined in the Deesa Jail. Two of the six convicts who escaped from Subordinate Jails were still at large at the end of the year. The one death occurred in the Umarkot (Thar and Párkar) Jail. Eight convicts have been executed, one at Ahmednagar, three at Belgaum and four at Sátára. The number of convicts remaining on the last day of the year was 230 males and 14 females.

Appendix E.—Number and disposal of civil prisoners.

34. The following table gives particulars regarding civil prisoners for the past two years:—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Number remaining at close of previous year	114	1	115	120	...	120
Number received during the year.	1,906	6	1,912	1,769	1	1,770
Total population...	2,020	7	2,027	1,889	1	1,890
Released during the year ...	1,900	7	1,907	1,752	1	1,753
Died	...	...	...	1	...	1
Remaining on 31st December ...	120	...	120	136	...	136
Daily average number...	109	...	109	114	...	114

35. There has been a decrease of 142 in the number of admissions during the year under report as contrasted with the year 1891. The Ahmedabad Jail shows a further decrease in the number of admissions. The number received into the Ahmedabad Jail in 1890 was 320, in 1891 it was 197, and in 1892 it has been 145. The Common Jail and the jails at Poona, Surat and Hyderabad also show a decrease under the head of admissions. The number admitted into the jails at Thána and Karáchi has increased. There has been one death amongst the prisoners in the Belgaum Civil Jail. The daily average strength has been 114 or 5 higher than in 1891, and this increase has caused a fall in the average cost from Rs. 71-2-7 in 1891 to Rs. 69-9-6 in the year under review.

FINANCIAL.

36. The gross expenditure for Central and District Jails, subordinate jails and lock-ups during the past two years is shown in the table below :—

Statements Nos. X and XI.—Expenditure.

	1891.	1892.
	No.	No.
Average number of prisoners	7,799	8,022
	Rs. a. p.	Rs. a. p.
Inspection and general superintendence	25,579 0 0	27,369 0 0
Cost per prisoner	**3 4 6**	**3 6 7**
Rations	2,11,661 0 0	2,47,582 0 0
Cost per prisoner	**27 2 3**	**30 13 10**
Establishment	1,84,247 0 0	1,85,373 0 0
Cost per prisoner	**23 10 0**	**23 1 9**
Police guards	37,411 0 0	36,039 0 0
Cost per prisoner	**4 12 9**	**4 7 11**
Hospital charges...	12,162 0 0	13,514 0 0
Cost per prisoner	**1 8 11**	**1 11 0**
Clothing	22,110 0 0	20,445 0 0
Cost per prisoner	**2 13 4**	**2 8 9**
Contingencies	56,017 0 0	54,328 0 0
Cost per prisoner	**7 2 11**	**6 12 4**
Gross cost of maintenance	5,49,187 0 0	5,84,680 0 0
Cost per prisoner	**70 6 8**	**72 14 2**

37. It will be observed that there is an increase amounting to Rs. 35,493 in the total expenditure of the past year over that for 1891. The average cost per prisoner has risen from Rs. 70-6-8 in 1891 to Rs. 72-14-2 in 1892. This increase is almost entirely due to the high prices of the chief food-grains which have ruled more or less throughout the year.

38. The charges incurred on "Inspection and general superintendence" show an increase which is accounted for by the allowances sanctioned in connection with my deputation to attend the Jail Conference at Calcutta during the month of January 1892, and the allowances drawn by my *locum tenens*, while I was absent on privilege leave for three months.

Rations.

39. The cost per prisoner for rations has risen from Rs. 27-2-3 in 1891 to Rs. 30-13-10 in 1892, or an increase of Rs. 3-11-7. This increase may be ascribed to the unfavourable rates for cereals prevailing at the time that the provisioning contracts were fixed. In some of the jails the tenders of the contractors were so high that the system of provisioning the prisoners by monthly purchases direct from the bazár had to be resorted to, at a considerable increase over the rates secured during the previous year. The usual allowance for rationing prisoners in lock-ups had also to be increased. The table below shows the average rate at which the chief food-grains were purchaseable during the years 1891 and 1892. The rate for bájri, which taken all round is the chief cereal consumed in the jails of this Presidency, has been very high as compared with the rate ruling in 1891:—

	Average Rate per Rupee.			
	1891.		1892.	
	Lbs.	oz.	Lbs.	oz.
Rice	19	15	19	12
Wheat	22	9	20	10
Bájri	35	15	28	9
Jowári	33	13	32	8
Dál	26	2	21	9

40. The average cost of rations per head of convicts in the Central and District Jails during the year has been Rs. 30-7-10. This has been exceeded by the jails of Yerrowda Rs. 30-8-1, Bijápur Rs. 33-11-7, Deccan Gang Rs. 44-9-2, Hyderabad Rs. 32-9-7, Aden Rs. 40-10-2, and Nára Gang Rs. 50-6-10. The very high rate for rations in the Nára Gang is due to a commission on bazár rates having been allowed to the contractor to recoup him for the expenses incurred through the frequent movements of the gang in a district where transport was scarce and food-supplies had to be brought from a considerable distance. In the Bombay City jails the cost of rations per convict in the year 1892 has been Rs. 26-7-4 against Rs. 24-15-2 in 1891, in the Deccan Rs. 28-13-4 against Rs. 24-8-9, in the Southern Marátha Country Rs. 38-3-10 against Rs. 31-15-11, in the Konkan Rs. 25-6-8 against Rs. 24-6-0, in Gujarát Rs. 25-2-6 against Rs. 24-1-0, in Sind Rs. 32-7-1 against Rs. 28-2-4, and in Aden Rs. 40-10-2 against Rs. 40-3-6. I trust that Government will be disposed to agree with me that, in view of the general marked rise in prices for food-grains on this side of India which commenced in the closing weeks of 1891, the increased annual rationing charge per prisoner—taking our jails as a whole—of Rs. 3-11-7, is not excessive. The estimated value of vegetables supplied by the jail gardens for provisioning the prisoners has been Rs. 16,186-11-1. This amount would have been higher had not some of the vegetables growing in the gardens suffered from an excessive rainfall. The storage of grain in pits is being experimentally tried in the Dhárwár Jail, and the result will be reported on next year. The high prices ruling at Dhárwár and all over the Southern Marátha Country during so many months of the past year have contributed to delay the inception of the above experiment to a later date than I could have wished.

Establishment and Police guard.

41. The decrease in the cost per head of establishment is due to the daily average number of prisoners having been higher in 1892 than was the case in the previous year. The same cause may be partly assigned for the decrease per head under the charge for Police guards. The increase in the total cost of establishment and the decrease in the total cost of Police guards are due to the increase in the numbers of the armed warder staff of the Nára Gang and to a

corresponding reduction in the strength of the Police guard attached to that gang.

Hospital charges.

42. Both the total cost and the cost per prisoner under the head "Hospital charges" have increased, the former by Rs 1,382 and the latter by annas 2 and pie 1 as contrasted with the figures for 1891. There has been an increase in the sickness during the year and an increase in the number of serious cases of illness.

Clothing.

43. The total cost of clothing has fallen from Rs. 22,110 in 1891 to Rs. 20,445 in the year under report. The average cost per prisoner is also less by annas 4 and pies 7. The decrease in the amount spent on clothing is attributable in the case of the large jails to the good condition of the stocks of clothing in hand at the end of 1891. The increase in this item in the Nára Gang has been caused by the issue of special woollen caps and socks to the prisoners. The Dhulia Jail has been allowed a more liberal supply of clothing in view of the organization of the Dedargaon Gang, which is an offshoot of that jail. In the Ahmedabad and Dhuliákot Jails it was found necessary during the cold season to renew a portion of the woollen clothing, and this has added to the outlay under this head on the part of these two jails.

Contingencies.

44. The total expenditure under the head of "Contingencies" has amounted to Rs. 54,328 during the year as compared with Rs. 56,017 during the year 1891. The average expenditure per prisoner in the Central and District Jails has been less by 10 annas and 9 pies than was the case in the previous year, while the cost per prisoner under the same head in lock-ups exhibits an increase of about Rs. 4. This increase, which is very marked, is partly due to purchases under the head of "Dead stock," metal vessels for eating and drinking purposes having been substituted for the earthen utensils previously in use. The average cost of contingencies per prisoner shows a decrease of annas 6 and pies 7. The subjoined table compares the expenditure in Central and District Jails during 1892 under this head with that of the previous year :—

	1891.	1892.	Increase.	Decrease.
Sanctioned Charges.	Rs.	Rs.	Rs.	Rs.
House-tax	216	510	294	...
House-rent	819	841	22	...
Horse allowance	889	884	...	5
Travelling allowances and expenses ...	990	745	...	245
Special allowances to Hospital Assistants...	1,156	1,222	66	...
Clothing to establishment	2,345	965	...	1,380
Water-rates	6,158	7,230	1,072	...
Total ...	12,573	12,397	1,454	1,630 176
Controllable Charges.				
Moving prisoners	6,903	4,262	...	2,641
Transportation charges	2,349	1,491	...	858
Service postage stamps	1,532	1,497	...	35
Dead stock	2,977	3,966	989	...

Other petty contingencies	10,407	9,296	...	1,111
Total ...	31,852	28,617	1,572	4,807 3,235
Grand Total ...	44,425	41,014	3,026	6,437 3,411

45. Turning to the "Sanctioned charges" the increase under "House-tax" is mainly due to the buildings of the Thána Jail having been taxed to the extent of Rs. 300 for two years during the year under report. That under the head "Water-rates" has been chiefly caused by the payment during the year under report, in the case of the Bombay jails and the jail at Ahmedabad, of the water-rate for six months of the year 1891. The Yerrowda Jail still shows a large consumption of water. Extra meters were put on during the year with a view to discover whether there was any leakage, but none was traced. Possibly, when the new bathing platforms are constructed at Yerrowda, it may be feasible to reduce the consumption of water in that jail. Of the "Controllable charges" the decrease under the head of "Moving prisoners" has been caused by the number of prisoners transferred having fallen short of that in the preceding year. The same may be said of the transportation charges, with the addition that the adoption of the Madras route has been productive of economy. The supply of zinc pots and plates to a number of jails, and the purchase by the House of Correction and the Thána Jail of copper boilers for washing the prison clothing has been productive of the increase under the head of "Dead stock." The Deccan Convict Gang is chiefly responsible for the increase under "Subsistence money." The releases from that gang during the year under report have far exceeded the numbers for 1891. The decrease under the charge "Other petty contingencies" is attributable to the fact that the Deccan Gang has been stationary throughout the year.

Statement No. XII.—Employment of convicts.

46. The following table compares the employment of convicts for the last two years :—

		Average number under sentence to labour.	Sick and convalescent.	On unremunerative labour.	Prison Officers.	Prison servants.	Gardening.	Grinding grain and preparing articles for Jail use.	On additions, alterations and repairs to Jail building.	Manufactures.	Extramural labour.
1891...	Number ...	6,697	471	368	304	614	393	864	344	2,074	1,265
	Percentage...	100·	7·0	5·5	4·5	9·2	5·9	12·9	5·1	31·0	18·9
1892...	Number ...	6,953	509	383	317	601	410	839	400	2,165	1,329
	Percentage...	100·	7·3	5·5	4·6	8·6	5·9	12·1	5·8	31·1	19·1

47. It will be seen from the above table that the total daily average number of prisoners sentenced to labour has increased by 256, from 6,697 in 1891 to 6,953 in 1892. The daily average number of sick and convalescent prisoners has risen from 471 in 1891 to 509 during the year under report, equivalent to an increase of 0·3 per cent. The numbers on "Unremunerative labour" and "Gardening" exhibit an increase, but the percentage in both cases remains the same. "Prison servants" as well as those employed on "Grinding grain and preparing articles for Jail use" show a decrease. The increase in the number employed on "Repairs, alterations, &c., to jail buildings" has been due to the employment of a larger number of prisoners on the repairs to the jail at Thána. The percentages of the numbers shown as employed on "Manufactures" and "Extramural labour" have been about the same in both years. The number under the latter head would have been somewhat greater had it not been for the prevalence of cholera in the Thar and Párkar District, which for a time interfered with transfers to the Nára Gang.

Statement No. XIII. Appendix G.—Earnings.

48. This statement shows the net cash earnings of convicts sentenced to labour. These earnings have amounted during 1892 to Rs. 1,14,314 against Rs. 1,46,080 in 1891. This great decrease of Rs. 31,766 is partly due to outstandings to the extent of Rs. 13,600, the major portion of which is the value of convict labour employed on the works connected with the new Central Jail at Hyderabad, not yet having been adjusted, and to the further fact that the prisoners of the Hyderabad and Karáchi Jails and those of the Nára Gang had to cease work for various periods while cholera was prevalent in the vicinity

of those jails. The Nára Gang was actually without remunerative work for about three months during the year. The demand for extramural labour has also, especially in the matter of canal clearance work at Shikárpur, been appreciably less than in 1891. At Thána too, where during a considerable portion of 1891 a gang of prisoners was employed on the works in connection with the Tansa duct, the extramural earnings for the past year have been less by Rs. 2,857 than was the case in the year preceding. The average earnings of each prisoner employed on manufactures have been Rs. 30-12-0 against Rs. 41-3-0 in 1891, and the average earnings of each prisoner sentenced to labour Rs. 16-1-0 against Rs. 21-4-0 in 1891. The table below gives the net profits, for the past four years, of the jail factories :—

	1889.	1890.	1891.	1892.
	Rs. a. p.	Rs. a. p.	Rs. a. p.	Rs. a. p.
Net profits ...	42,295 0 0	42,916 0 0	52,522 0 0	49,370 0 0
Profit per prisoner ...	18 7 8	21 5 9	25 5 2	22 12 10

49. *Manufactures.*—Ten of the jails exhibit a decrease in profits under this head as compared with 1891. The fall in receipts of the Common Jail is ascribed to the paucity of orders, and as there is an increase under this head in the House of Correction, it may be assumed that a portion of the orders which have usually been given to the Common Jail have found their way to the House of Correction. The decrease in the profits of the Yerrowda Jail is set down to the fact that a quantity of unserviceable dead stock, which had hitherto been shown at prime cost, has been disposed of, and the difference between the original value and the price realized written off the books. In addition to this the rates for coir yarn, an article which is largely used in the factory of that jail, has increased by about 5 pies per lb., thus tending to reduce the profits of convict labour on manufactured articles. The decrease in the Dhulia Jail is due to a smaller number of prisoners having, owing to the formation of the Dedargaon Gang, been employed in the factory of that jail. The Aden Jail shows a falling off in the profits derived from the printing press, and this is owing to the establishment in the Settlement of other printing presses. As anticipated in my report for 1891, the McKinlay Tariff has had a most prejudicial effect on the manufactures of the Thána Jail, which shows a profit of about one-half of the sum realized in 1891. The amount realized by the manufacture of carpets in this jail, articles which used to be largely exported to America, has fallen from Rs. 5,762 in 1891 to Rs. 1,491 in the year under report.

50. There has been a decrease of Rs. 23,448 in the earnings under the head of extramural labour, although the average number of prisoners employed on this kind of work has been 1,329 during the year under report against 1,265 in 1891. The three Sind Jails all exhibit a decrease in the average earnings per prisoner for reasons which are indicated in paragraph 48 of this report. The Dedargaon Gang is employed in connection with the Dhulia water-supply works, and, though its operations show no profit, it has done and is doing good work in a locality where free labour seems difficult to obtain. The absence of profits is due to the cost of the barracks in which the prisoners are housed having been recouped from the earnings of the prisoners. At the close of the year under report the cost of the barracks had been practically cleared off by the labour of the gang. The gang, which is about 120 strong, will with the termination of the coming monsoon be made up to a strength of 200 prisoners to admit of the dam, on the construction of which the convicts are employed, being pushed on and completed before the rains of 1894 make their appearance.

Appendix H.

51. The cash realizations under the different heads of labour on which the prisoners have been employed are given in the subjoined table :—

	1891.			1892.		
	Rs.	a.	p.	Rs.	a.	p.
Factory	50,882	0	0	51,650	0	0
Garden	2,137	0	0	4,046	0	0
Extramural labour	87,714	0	0	53,341	0	0
Building and repairing jails ...	3,413	0	0	3,665	0	0
Subordinate jails	1,934	0	0	1,612	0	0
Total ...	1,46,080	0	0	1,14,314	0	0

52. The increase under the head of "Garden" has been due to a more favourable rainfall in the year under report than in the preceding year. In the case of the subordinate jails, although the receipts have been up to the average, the profits have not been as satisfactory as anticipated, the purchase of some head of live stock to replace unserviceable animals having added to the expenditure.

Statement No. XIV.—Net cost.

53. This statement shows the total cost of guarding and maintenance for Central and District Jails and lock-ups and the total net cost to Government. The total expenditure excluding "Inspection charges" for 1892 has been Rs. 5,57,311 against Rs. 5,23,608 in 1891, an increase of Rs. 33,703. The actual cash realizations have been 1,14,314 in 1892 against Rs. 1,46,080 in 1891, a decrease of Rs. 31,766, thus making the total net cost to Government Rs. 4,52,997 against Rs. 3,77,528 in 1891, or an increase of Rs. 65,469. The net cost per prisoner has risen from Rs. 48-6-0 to Rs. 55-3-0, an increase of Rs. 6-13-0 per head. The financial results of the past year in this Department are, it may at once be said, distinctly unsatisfactory. The causes which have mainly contributed to bring about the above state of things have been set forth in paragraphs 39, 40, 48, and 49 of this report. Our extramural earnings for 1892 have been less by Rs. 23,448 than in the preceding year, while in Thána Jail factory the realizations on account of carpets alone show a falling off to the extent of Rs. 4,271. These two sums taken together account for Rs. 27,719 of the sum of Rs. 31,767, which, as shown above, represents the decline in cash realizations during the past year, while as regards the increase of Rs. 65,469 in the total net cost to Government—a fiscal result on which, be it remembered, the drop in cash realizations, has of course a most direct bearing—the increased rationing charges, due to causes already explained in an earlier portion of this report, have amounted in the aggregate to Rs. 35,921, or considerably more than half the above sum of Rs. 65,469.

VITAL.

Statement No. XV.—Sickness and mortality.

54. This statement shows the sickness and mortality among prisoners of all classes during the year. With a daily average strength of 8,022 confined in jails and lock-ups there have been 6,311 admissions into hospital; the daily average number of sick has been 234·93; and the total number of deaths 293 or 36·5 per mille of average strength, an increase of 4·1 per mille over the figures for the year 1891.

Appendix A.—Accommodation.

55. The table below gives particulars of the capacity of the several jails. In this connection I may observe that I have recently, as a result of my visits to the jails of Shikárpur and Karáchi, directed a re-calculation of the cubical space in the sleeping barracks of those prisons. In those sleeping barracks there are peculiarities of construction as regards their roofs, and the accommodation shown in the annexed table against the two jails, based as it is on a calculation of the cubical space, which has failed to take into account those peculiarities, is in my opinion misleading. The result of the re-calculation now ordered will appear in the report for the present year, to be submitted to Government a twelve-month

hence, and it will be sufficient on the present occasion to remark that that recalculation will appreciably increase the estimated accommodation afforded by each of the two jails. The reduction of 17 in the capacity of the Shikárpur Jail on the figures of last year is due to the removal of some of the cells in connection with the improvements in the condemned cells of that prison :—

Jails.	Capacity, inclusive of Hospital and Cell accommodation.	Daily Average.	Maximum Population.
Common Jail	180	222	275
House of Correction	262	326	378
Yerrowda	1,482	1,160	1,371
Násik	31	44	92
Dhulia...	199	288	360
Bijápur	294	268	307
Dhárwár	336	347	388
Kárwár	218	83	102
Ratnágiri	228	89	130
Thána	653	629	763
Ahmedabad	373	459	534
Dhuliákot	380	209	249
Kaira...	136	213	271
Surat...	149	181	217
Rájkot	61	60	78
Karáchi	364	306	391
Hyderabad	596	665	808
Shikárpur	337	551	655
Aden...	61	82	122
Total ...	6,340	6,182	7,491

56. Overcrowding has existed in the Common Jail, the House of Correction, and the Jails of Násik, Dhulia, Dhárwár, Ahmedabad, Kaira, Surat, Hyderabad, Sikárpur, and Aden. When practicable, frequent transfers have been effected to relieve the overcrowding. The overcrowding in the jail of Dhulia is more apparent than real, for the prisoners, about 120 in number, employed in the Dedargaon Gang, who are included in columns 3 and 4 of the above statement, are housed in temporary barracks which have been constructed in the immediate neighbourhood of the work on which the gang is employed. As remarked in the preceding paragraph the figures in the statement, illustrative of the accommodation afforded by the Shikárpur Jail, are undoubtedly misleading. In the hot weather months—and this has been explained in previous reports—any overcrowding in a technical sense arising in the Shikárpur Jail is but little more than a nominal matter owing to the fact that the prisoners sleep at night not in the barracks but in the yards of the jail and in the open air, while on other occasions tents are at times employed to relieve the overcrowding in the barracks. The completion of the new Central Jail at Hyderabad should largely obviate, if not entirely remove, the overcrowding in the Sind jails, as should also the completion of the Central Jail at Ahmedabad and the new Agency Jail now under construction at Rájkot prevent the overcrowding of the jails in Gujarát. There are very few matters in jail administration which claim a closer attention on the part of the Inspector-General than the regulation by transfer of the populations of the various jails subordinate to his control with a view to prevent any one of those jails becoming unduly full. No one, however, who has not had some practical experience in dealing with a question such as the above, can fully realize the difficulty, nay, the impossibility—when any jail is rapidly filling up and cholera is rife in the neighbourhood of that jail or in the neighbourhood of any other jail to which, in the absence of any such epidemic, the surplus population of the former prison would be capable of transfer—of at times preventing instances of overcrowding, and pronounced overcrowding, arising,

57. The abstract below deals with the sickness and mortality amongst convicts and under-trial prisoners in the Central and District Jails during the past two years :—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Total population	25,661	1,013	26,674	25,252	1,091	26,343
Daily average strength	6,772	215	6,987	6,975	237	7,212
Number admitted into hospital ...	4,814	111	4,925	5,780	130	5,910
Daily average sick	185·43	4·5	189·93	222·8	4·7	227·5
Number of deaths	236	4	240	271	1	272
Ratio per mille of deaths to total population ...	9·2	3·9	9·0	10·7	0·9	10·3
Do. do. to strength...	34·8	18·6	34·3	38·8	4·2	37·7
Do. do. to admission into hospital	49·0	36·0	48·7	46·9	7·7	46·0

58. Of the number admitted into hospital the figures for 1892 show an excess of 985 over those of 1891. The Yerrowda Jail has under this head 1,259 admissions for ague against 265 in 1891. The Medical Officer states that the type of fever was not severe and that the symptoms did not point to influenza. As the admissions were chiefly after the month of October, the heavy local rainfall during that month, which was only 64 cents less than the total fall for 1891, must, it is only reasonable to assume, have been a potent factor in connection with the outbreak in question. I visited the Yerrowda Central Jail on several occasions in the month of last November, and on one of those occasions—and the figures may be taken as typical of the amount of sickness in the jail for a period of several days—I found, out of a population of 1,345, no less than 435 were patients in hospital. The ordinary hospital accommodation of the jail was of course under the above circumstances altogether inadequate to meet the strain which was thus put upon it, and several of the sleeping barracks had for a time to be utilized as sick wards. In the letter which, as the outcome of my annual inspection of the Yerrowda Jail in November, I addressed to Surgeon-Lieutenant-Colonel Salaman, the Superintendent of that jail, I recorded my appreciation of the strenuous and successful efforts which under his supervision and guidance were being made to cope with the above extraordinary epidemic of fever, and that expression of opinion I desire to repeat here, adding that, making every allowance for the fever in question having been one of a mild type, the fact that there was not a single death in Yerrowda in November and only one in December, and that from a cause other than fever, speaks right well for the medical arrangement of our largest jail at a time when that management was subjected to a very pronounced strain.

59. The number of deaths in 1892 has been 272 against 240 in 1891 or an increase of 1·3 in the ratio per mille of deaths to total population as compared with the year preceding that under report. The ratio of deaths per mille to the number admitted into hospital has been 2·7 less than the year 1891. The jails in which the mortality has exceeded 33·3 per mille of the average strength are those of Ahmedabad, Surat, Násik, Thána, Hyderabad, Karáchi, Nára, Kaira, and Shikárpur.

Ahmedabad.—The number of deaths in the jail during the year has been 16 against 17 in 1891, 6 having been due to diarrhœa, 2 to pneumonia, and 1 each to asthma, influenza, chronic bronchitis, phthisis, anæmia, debility, epilepsy, and dysentery. Seven of the deaths occurred amongst prisoners between 55 and 80 years of age. Owing to the representations of the medical officer the dimensions of the sleeves of the jackets and of the legs of the trousers issued at Ahmedabad during the rainy season to prisoners of a more or less advanced age are about to be increased. Measures of the above nature have already been adopted as regards the cold weather clothing issued to the prisoners at Ahmedabad.

Surat.—The mortality in this jail (7) has been high as compared with that of the previous year, in which only 2 deaths occurred. Of the 7 fatal cases reported 2 died from cholera, 1 from compound fracture of the skull—the result of an assault committed by a fellow prisoner—1 from anæmia, 2 from dysentery, and 1 from pneumonia. The 2 prisoners who died from anæmia and pneumonia had been admitted into jail in an indifferent state of health.

Násik.—The number of deaths in the Násik Jail has amounted to 2. Of these 1 prisoner had been only one night in jail when he succumbed to an attack of remittent fever. The other prisoner, who died of dysentery, was an old man, who was in a debilitated condition on the occasion of his admission into jail.

Thána.—The mortality in this jail for the year 1892 compares unfavourably with that for the previous year. There have been 26 deaths in the year under report as against 14 during the year 1891. The mortality has been mainly due to pneumonia, which was prevalent during the cold season, and which carried off 5 prisoners. Three deaths occurred amongst convicts who had been transferred in a feeble condition, and for change of air, from the House of Correction. In a strict sense, therefore, these three deaths belong, if I may so express myself, to the House of Correction and not to the Thána Jail. There was one death of an old man of sixty, and one case of suicide by drowning. The latter prisoner put an end to his existence by jumping into the moat surrounding the jail.

Hyderabad.—The death-rate in this jail during the year under report exhibits an improvement on that for the year 1891, 31 deaths having occurred in the later as compared with 47 in the earlier period. Of these 4 died from cholera, which was prevalent in a severe form in the immediate neighbourhood for many weeks, carrying off 631 persons out of a total of 888 attacked. The three fatal cases of pneumonia which occurred were amongst prisoners admitted into jail with the disease upon them, and in such an advanced stage that their admission into hospital was synchronous with their admission into jail. Of the 31 deaths in this jail 12 have taken place amongst the convicts employed on extramural work, the average number of Hyderabad prisoners so employed during the past year having been 278.

Karáchi.—The death-rate in this jail for 1892 compares unfavourably with that for the previous year. The figures exhibit a death-rate of 52·3 per mille for the later against 28·9 per mille for the earlier period. The number of admissions into hospital have numbered 151 against 145 in 1891, and the daily average sick-rate has been 7·6 against 7·2. During the year 1891, the number of deaths was 9, while in the year under report it has been 16. Cholera was epidemic in the City of Karáchi in the middle of the year and of 1,234 cases which occurred amongst the free population, 972 proved fatal. There have been only two cases in the jail, and of these one recovered. "Diarrhœa" was prevalent amongst the prisoners, and this disease together with "Dysentery" proved the cause of five deaths. The months of January and March appear in this jail to have been abnormally unhealthy periods. There was one case of enteric fever which terminated fatally. Neither the prisoner who was carried off by cholera nor the one who succumbed to enteric fever had been employed outside the jail walls. It may be stated here that the Chemical Analyser, to whom a sample of the drinking water of this jail had been sent, reported unfavourably thereon. The jail derives its water-supplies from the local water-works, and the above matter has been brought to the notice of the Municipality, and is at present the subject of correspondence.

Nára.—The death-rate of this gang during the year, 64·1 per mille, although lower than in 1891, when it was 109·8, has still been high. Of the 20 deaths which took place, 7 were prisoners who were convalescent, after having been attacked by influenza of an epidemic character which prevailed amongst the prisoners during the month of December 1891. Of these 7, 2 died from "Debility," 4 from "Anæmia," and 1 from "Remittent fever." Five deaths occurred during the month of November. This gang is at present located at Hyderabad in the buildings of the new Central Jail, on the works of which the prisoners are employed.

districts. The class of weather to which I have referred above continued at Shikárpur during the first weak of January 1892. The Jail Hospital commenced to rapidly fill up, and before the first month of the new year was over 34 prisoners, or more than 6 per cent. of the entire jail population were dead. Of the 30 prisoners who in January, 1892, were carried off by pneumonia, 8 had been employed on canal work, 4 had been employed in the jail garden, 8 were jail sweepers, 4 had been employed in the jail factory, 1 was a hospital attendant, (who appears to have contracted the disease from the pneumonia patients on whom he was attending), 1 was a prisoner sentenced to simple imprisonment, and 4 were under-trials; in other words, 18 out of the 30, or nearly two-thirds of the entire number, were prisoners who, it may fairly be said, had been subjected to a minimum of exposure. I am not a medical man myself, but there are, I think, occasions on which it is within the competency of the lay mind to express an opinion as to the general adequacy of any measures which may have been adopted for the purpose of protecting large bodies of men from the inroads of disease, and having, as the result of my inquiries, carried out in person at Shikárpur within a very few days after the wave of mortality to which I am referring had swept over the jail of that station, informed Surgeon-Captain Arnim that he appeared to me to have done every thing in his power to prevent and check the mortality in question, I have no hesitation in repeating that opinion on the present occasion. The month of January, 1892, was, as I stated in paragraph 42 of my last Annual Report, an extraordinarily unhealthy one among the free population in the town of Shikárpur, the registered deaths in that town during the month named having been very nearly four times as many as those during the corresponding month in 1891. The mortality during the remainder of the year under review in the Shikárpur Jail, though relatively speaking in no way on a par with that which marked the first month of that year, has still been very heavy, the deaths during the remaining months of the year having numbered 33, making a total of 67 deaths among the Shikárpur prisoners during 1892, equal to a ratio of 121·6 per mille. In 1891 the deaths numbered 35, the ratio per mille having been 57·4. Of the 67 deaths, 39 were due to pneumonia, 4 to remittent fever, 3 to heart disease, 2 each to diarrhœa, dysentery, debility, rheumatism, pleurisy, and sunstroke, and 1 each to bronchitis, ague, hœmoptysis, cerebral meningitis, heat apoplexy, liver complaint, hemiplegia, syphilis, and affection of the urinary organs. The number of admissions into the Jail Hospital at Shikárpur has during the past year been 404, and the daily average number of sick has been 18·5. In the ill-omened month of January, to which reference has so frequently been made above, the figures under these two latter heads were 100 and 47·8 respectively. The Shikárpur Jail has for many years borne an evil name by reason of the high rate of mortality which it has almost invariably year by year exhibited. It is true that we must travel back to the year 1879 to find a death-rate exceeding that for 1892. In the first-named year with a very much overcrowded jail (for the daily average strength was in excess of 900), there were 114 deaths among the prisoners, and the ratio per mille of mortality stood at 124·2. But in the last 15 years in only two years (1888 and 1889) has the ratio fallen below 33·3, when it stood at 27·7 and 32·4 respectively, while in three several years it has exceeded 100, in two it has stood between 70 and 80, in three between 60 and 70, in one between 50 and 60, in three between 40 and 50, and in one between 33·3 and 100 per mille. In these last fifteen years there have in all been 653 deaths in the jail of Shikárpur, 262 of these having been due to diseases of the respiratory organs, notwithstanding that every endeavour has been made, by increasing the clothing of the prisoners, by regulating their employment, by improving their diet, and by improving the ventilation of the sleeping barracks and the means of warming such barracks in the cold season, to protect the jail population from the dangers arising from sudden chills. If the 15 groups of yearly figures, illustrative of daily average strength throughout the above period, be added together, we get a total population of 9,752 prisoners, so that during these 15 years the average yearly ratio of deaths to population in the Shikárpur Jail has been 67·5 per mille. I can come to no other conclusion but that at times the jail of Shikárpur is by reason of certain more or less subtle atmospheric or climatic influences an unhealthily situated prison. Though Shikárpur is a

considerable number of miles from the nearest point on the Indus, the fact, which is I believe undisputed, that the site of its jail is below the level of the bed of that river, must, in a sanitary sense in the inundation season, be viewed as the reverse of satisfactory. Then, too, if I may be pardoned for saying so, with a notoriously unhealthy jail such as that under immediate reference, it is I think most undesirable that there should be such a constant change in the personnel of the Superintendent and Medical Officer as has in recent years proved to be the case, and to this opinion, regarding the undesirability of a constant change in the medical charge of the jail, I should adhere even if the person so appointed were on each occasion to be one of the most eminent medical men that the world could produce. I trust that it will not be thought that I am endeavouring indirectly to assail the medical administration of the Shikárpur Jail by any of the numerous officers who have been charged therewith since my connection with this Department commenced some six and a half years ago. I simply desire to record my opinion, in terms which Government will not, I trust, consider too emphatic, that in the interests of the health of the prisoners of the jail under reference a constant change in the personnel of the medical officer of the jail is a matter to be deprecated. With the opening of the new Central Jail at Hyderabad the prison population of Upper Sind will be materially reduced. We shall still, however, require accommodation for from 300 to 350 prisoners in Upper Sind, and I may state that I am at present engaged in maturing a scheme for the enlargement of the old Subordinate Jail of Sukkur, with a view to its becoming the Jail of the Shikárpur District. Sukkur, at which station we had for several years a considerable gang of Shikárpur prisoners employed on the earthworks in connection with the Lansdowne Railway Bridge which spans the Indus, is, as the records in this office show, a far healthier locality for a jail than Shikárpur, while the limestone formation which crops up in so many spots in its immediate neighbourhood appears to offer desirable facilities for the prosecution of quarrying, metal-breaking, and lime-burning, all of them in my opinion very desirable forms of employment for prisoners, whether long or short termers. Though I have not his express permission to say so on the present occasion, I feel confident that Mr. James, the Commissioner in Sind, will not take exception to my stating that provided it be financially feasible he views my scheme for the abandonment of the jail buildings at Shikárpur and the establishment in its place of a District Jail at Sukkur, with approbation. The approbation of Government to that scheme, when hereafter I shall have had the honour of placing it before them, I likewise hope to secure, and trust that when funds are available to admit of effect being given to my proposals in the matter, Government may see fit to direct that the work in question be carried out. The District Jail at Shikárpur and the Subordinate Jail at Sukkur are both of them constructed of sun-dried brick, and it is proposed that the contemplated additions to the latter jail should, if sanctioned hereafter, be carried out in the above economical and—in view of the fierce heat of Upper Sind during the hot weather, and of the limited capacity, compared to stone or fire-burnt bricks, of sun-dried bricks in the matter of heat absorption—suitable material. I am not at present in a position to say approximately what the cost of the proposed enlargement of the Sukkur Jail would amount to, but I do not anticipate that such cost will, if Government are disposed to concur in my proposals regarding the abandonment of the jail at Shikárpur, be viewed as unduly high. It is now some years since a number of the head-quarter offices of the district were removed from Shikárpur to Sukkur, and the move of the jail to Sukkur, which is an infinitely more popular station than Shikárpur, should, while proving in itself markedly beneficial in respect to the reduction of the sick and death-rate among the prisoners who work out their sentences in the District Jail of Upper Sind, tend very very largely to obviate the constant changes in the medical charge of the jail to which I have drawn attention.

60. The total number of deaths in our Central and District Jails in the months of January and February 1892 was 70. In the same two months of the present year the number of deaths has been exactly one-half the above figure, namely, 35. In the matter of our mortality roll we have, in view of the record

of the opening weeks of 1892, commenced the present year under bright auspices, and this favourable state of things may, I sincerely trust, continue and progress as the year goes on.

61. The following statement deals with the sickness and mortality in the subordinate jails and lock-ups during the past two years :—

	1891.						1892.					
	Subordinate Jails.			Lock-ups.			Subordinate Jails.			Lock-ups.		
	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.
Total population	5,826	345	6,171	26,776	1,516	28,292	5,769	337	6,106	26,592	1,444	28,036
Daily average strength	266	13	279	514	19	533	270	16	286	506	18	524

Daily average sick...	4·74	0·37	5·11	1·64	0·03	1·67	5·29	0·57	5·86	1·41	0·16	1·57
Number of deaths...	2	...	2	11	...	11	6	1	7	14	...	14
Ratio per mille of deaths to total population ...	0·3	...	0·3	0·4	...	0·4	1·0	3·0	1·1	0·5	...	0·5
Do. do. strength ...	7·5	...	7·2	21·4	...	20·6	22·2	62·5	24·5	27·7	...	26·7
Do. do. admissions into hospital.	9·2	...	8·8	98·2	...	93·2	23·8	45·5	25·5	120·7	...	110·2

62. The number of admissions into hospital in the subordinate jails and lock-ups together has reached 401, and the number of deaths has amounted to 21. The figures under these heads for the year 1891 were 344 and 13 respectively. The number of deaths has increased from 13 in 1891 to 21 in 1892.

63. The annexed table is an abstract of Statement XVI, and gives the number of admissions into hospital and of deaths from the chief diseases among convicts confined in the Central and District Jails during the years 1891 and 1892 :—

Statement No. XVI

	1891.		1892.	
	Admissions.	Deaths.	Admissions.	Deaths.
Small-pox	3	...	...	...
Intermittent fever	1,296	1	2,301	3
Remittent or continued fever ...	188	20	328	22
Other fevers	214	3	180	6
Cholera	9	3	10	7
Scrofula and phthisis pulmonalis ...	25	14	18	4
Anæmia and general debility... ...	126	12	127	28
Respiratory diseases	539	103	426	78
Dysentery and diarrhœa	643	35	836	61
Jaundice	39	1	73	1
Ulcers and boils	117	...	89	...

64. During the year there have been no admissions under "Small-pox". The increase in the number under "Intermittent fever" is mainly accounted for by the outbreak in the Yerrowda Jail to which reference has already been made. The increase under "Remittent fever" is contributed by the jails of Bijápur, Dhárwár, Thána, Kaira, and Hyderabad. Cholera showed itself in four jails; Thána had 2 admissions, both patients recovering; Surat 2 admissions, both cases terminating fatally; Karáchi 2 admissions and 1 death; and Hyderabad 4 admissions and 4 deaths. The deaths under "Anæmia" and "General Debility" have been more than double the number in the previous year, although the number of

admissions has been almost exactly the same in both years. The Sind jails are responsible for fifteen of the deaths under this head, the influenza of the closing month of the previous year having apparently had something to do with this. The jails of Kaira, Dhárwár, and the Deccan Gang have contributed largely towards the increase under the heads of "Dysentery and Diarrhœa." The deaths from this cause in these three jails have numbered 5, 5, and 14 respectively, the figures for 1891 having been 3, 1, and 1. The number of admissions under jaundice have nearly doubled.

Statement No. XVII.—Mortality according to age.

65. This statement deals with the mortality amongst convicts according to age. The deaths amongst convicts from 40 to 60 and over 60 years of age show a very much higher ratio per mille than was the case in 1891.

Statement No. XVIII.—Mortality according to length of residence in Jail.

66. The following is a summary of Statement XVIII and shows the mortality according to the length of time passed in jail:—

	1891.			1892.		
	Average Number.	Deaths.	Ratio of Deaths per mille of average strength.	Average Number.	Deaths.	Ratio of Deaths per mille of average strength.
Under 6 months in jail	3,322	119	35·8	3,435	137	39·9
From 6 to 12 months	1,238	54	43·6	1,419	44	31·0
„ 1 to 2 years	1,125	36	32·0	1,052	41	39·0
„ 2 to 3 „	457	6	13·1	452	13	28·8
„ 3 to 7 „	453	15	33·1	460	22	47·8
Above 7 years	207	1	4·8	219	5	22·8
Total ...	6,802	231	34·0	7,037	262	37·2

67. With the exception of the number shown under "From 6 to 12 months" the numbers for the year under review all exhibit an increase over those of 1891. The increase is in a relative sense very marked under the last three heads.

68. This statement gives particulars of the condition of the prisoners who have been discharged from jail during the last two years. The results for 1892 compare favourably with those for the preceding year :—

	1891.		1892.	
	Number.	Percentage.	Number.	Percentage.
Numbers discharged during the year ...	15,768	...	15,746	...
Do. who gained weight	8,247	52·3	8,577	54·5
Do. who lost weight	4,800	30·4	4,393	27·9
Do. who remained stationary... ...	2,721	17·3	2,776	17·6

69. The statement below relates to the visits of inspection on the part of official visitors of jails, and shows a considerable advance on the figures for 1891,

the number of quarterly meetings, the aggregate number of official visitors attending those quarterly meetings, and the number of other occasions on which a jail was visited by an official visitor during 1892 having been 82, 369, and 1,391, respectively, against 72, 328, and 1,112 during 1891 :—

No.	Jails.	Number of Official Visitors appointed.	Quarterly Meetings.					Number of other occasions on which an Official Visitor visited the Jail during the year.	Number of visits paid by appointed Non-official Visitors during the year.
			Number in the year.	Number of Official Visitors present.

GENERAL REMARKS.

70. The new Central Jail at Ahmedabad is rapidly approaching completion and will be occupied when the monsoon of the present year is over. The works of the new Central Jail at Hyderabad, on which the prisoners of the Nára Gang and a considerable number of prisoners from the District Jail of Hyderabad have been employed for some time, are also rapidly progressing and this last-mentioned Central Jail should be ready for occupation during 1894. A new jail has also been commenced at Rájkot and will, it is anticipated, be completed in or about May 1894. In the jails of Yerrowda, Dhulia, Bijápur, Dhárwár, Thána, Karáchi, and Shikárpur a number of useful improvements has been carried out during the past year.

71. In accordance with instructions issued by me a new and improved description of rope was for the first time employed on the occasion of a triple execution at Thána last December, Mr. Wellis, the Superintendent of the Thána Jail, informing me thereafter that the executions in question were, as regards the rapidity with which death ensued on the falling of the drop, the most successful he had ever witnessed. This new description of rope, which in its peculiar features is modelled on one which Marwood, the executioner, showed me when I was on the visiting committee of Kilmainham (Dublin) Prison in 1883, will be introduced generally for use in connection with executions at the jails of this Presidency.

72. The following jails and gangs have been visited and inspected by Surgeon-Lieutenant-Colonel Salaman or myself during the past year:—

Shikárpur.	House of Correction.
Hyderabad.	Common Jail.
Nára Gang.	Thána.
Karáchi.	Aden.
Ahmedabad.	Rájkot.
Dhuliákot.	Yerrowda.
Broach.	Bhusával (Subordinate Jail).
Kárwár.	Dhulia.
Ratnágiri.	Dedargaon Gang.
Sátára (Subordinate Jail).	Bijápur.
	Sholápur (Subordinate Jail).

In addition to the above I have, in accordance with instructions received from Government, inspected during the past year the Agency Jail at Sádra in the Mahi Kántha, while, in company with some of the officers of the Political Department, who sought my opinion on certain matters connected with the new State Jail of Rájkot, and the Station Jail of Wadhwán, I have also visited the two last-named prisons during the year under report. When on the other side of India in the early months of 1892, attending the Jail Conference or returning therefrom, I had the advantage of visiting the Presidency, and Alipore Central Jails of Calcutta, the Central Jail of Buxar, the Central Jail of Agra, and the District Jail of Agra.

73. It now only remains for me to say that to Mr. C. N. Hall, the Personal Assistant in this office, my cordial acknowledgments are due for the entirely satisfactory manner in which he has during the past year discharged the duties of the above post.

I have the honour to be,

Sir,

Your most obedient Servant,

T. M. FILGATE,

Inspector-General of Prisons.

General Summary showing the Distribution of the Prisoners of all Classes confined in the Jails and Subsidiary Jails of Bombay during the year 1892.

Annual and Periodical Reports.—

Bombay Jails. Report on the—for the year 1892.

No. 3815.

JUDICIAL DEPARTMENT.

Bombay Castle, 23rd June 1893.

Letter from the Inspector-General of Prisons, No. 1925, dated the 6th May 1893—Submitting with his remarks the Annual Report on the Jails in the Bombay Presidency for the year 1892.

RESOLUTION.—While the total number of convicts and under-trial prisoners admitted to the jails of the Bombay Presidency during the year 1892 fell to 52,682, from 53,540 in the previous year, and the total number of persons confined during the year consequently shows a decrease, (from 61,137 to 60,485), the total number of admissions of convicts increased from 15,931 to 16,209. The following tabular statement gives the figures for the past five years :—

	Total admissions.	Admissions of convicts.	Proportion of admissions of convicts to total admissions.
1888	48,847	15,275	31 per cent.
1889	54,216	17,111	31 „
1890	52,538	15,849	30 „
1891	53,540	15,931	30 „
1892	52,682	16,209	30·7 „

It thus appears that since 1888 the total number of admissions has never been less than half a lákh. The daily average jail population was larger in the year under report than in 1891, having risen from 6,976 to 7,228; but the average duration of the sentences inflicted appears to have varied very slightly. Thus there is a substantial increase in the proportion of sentences of above one and under three months which is partly counterbalanced by a decline in the proportion of sentences of above three and less than six months' imprisonment. With regard to the nature of the remaining sentences, Government notice that the increase from 8 to 14 in the number of sentences of imprisonment for a term exceeding ten years, adverted to last year, has been followed by a further increase to 25. The number of convicts sentenced to death fell from 59 to 52 and the extent to which transportation was resorted to in the past five years is shown below :—

Year.	Sentences of Transportation.	
	For life.	For a term.
1888	97	96
1889	135	100
1890	151	104
1891	125	47
1892	123	26

These results show that, while the number of sentences of imprisonment for terms exceeding ten years has increased by 312·5 per cent., the number of sentences of transportation has decreased since 1890 by 58·4 per cent.

2. The appended table shows the number and disposal of convicted prisoners (male and female) during 1891 and 1892 :—

	1891.	1892.
Transferred to other jails—		
To undergo sentence	3,469	3,142
For transportation beyond seas, &c. ...	149	79
Released on appeal	914	865
Do. on expiry of sentence	13,513	14,031
Do. under Remission Rules	787	765
Do. by order of Government on account of sickness	3	4
Do. on other grounds	2	8
Transported beyond seas	126	112
Transferred to lunatic asylums	8	3
Escaped	21	14
Executed	38	25
Died	235	264
Number remaining on 31st December ...	7,114	7,207
Total ...	26,379	26,519

By the decrease from 914 to 865 in the number of convicts released on appeal, the percentage of such releases is reduced from 5·4 in 1890 and 5·7 in 1891 to 5·3 in the year under review. From Statement V attached to the report it would appear that though, as stated in paragraph 18, the total number of prisoners recaptured was 27, or one less than the number of escapes, only fourteen of these were convicts who escaped during the year under review. The number of escapes is far higher than it should be. While last year some of the escapes were attributed to the defective arms borne by the Deccan Gang guard, in the year under review no fewer than ten escapes out of the whole number were effected from the Hyderabad Jail, of which three were from inside the jail. The Governor in Council trusts that, on the completion of the new Central Jail, and on the introduction of such of the reforms in the warder establishments, indicated in Government Resolution No. 2159, dated the 8th April, 1893, as may be practicable, the Inspector-General of Prisons will be able to secure a more efficient and trustworthy staff for the guarding of the Hyderabad Jail. The Governor in Council fully approves of the steps ordered by the Inspector-General of Police to be taken with a view to impressing on the jail warder staff the responsibility which attaches to them when charged with the custody of prisoners.

3. The number of female convicts admitted rose from 771 in 1891 to 839 in the year under review, while only 111 juveniles were admitted against 123 in 1891. In the absence of any other explanation of the continued decrease during the past three years in the number of the latter, Government are perhaps justified in hoping that it may be due to a gradual decrease in crime. It does not appear to be due to a more extensive use of the Reformatory.

4. In paragraph 3 of Government Resolution No. 3285, dated the 20th June, 1892, the Governor in Council observed with satisfaction the increase in the number of persons classed as "habitual offenders" by the sentencing Courts. The report under review shows continued progress in the matter of identification of 'habituals.' Of the 16,209 convicts admitted to jail, 2,258 had been previously convicted, and, of this number, 1,662 were identified before trial. The figures for the previous year were 2,393 and 1,514 respectively. That the organization for identifying prisoners has made considerable advance is abundantly clear from the fact that the number of prisoners classified by Courts on conviction as habitual offenders was in the year under review 1,015 against 651 in 1891. The number of convicts who confessed to being habitual offenders was 33 against 47 in 1891 and 81 in 1890.

5. The number of jail offences (Statement VI) committed by prisoners during 1892 rose from 3,868 to 4,390, thus practically returning to the figure recorded in 1890. There were 786 cases of "smoking and possession of forbidden articles" as compared with 705 cases in 1891 and 683 in 1890. The Inspector-General of Prisons has not reported the result of his enquiries into the probable cause of the continued increase in the number of this class of offences, but Government trust that as soon as the reforms in the prison establishments contemplated in paragraph 8 of Government Resolution No. 2159, dated the 8th April, 1893, can be introduced, the entertainment of a better class of warders will result in less frequent instances of such breaches of prison discipline. The number of cases in which fetters were imposed declined from 8,514 to 7,202 and the number of instances of corporal punishment fell from 108 to 101. No females were fettered or flogged. The two following tables, which are given by the Inspector-General of Prisons in the body of his report, give an abstract of the number of offences committed and of the nature of the punishments :—

Offences.

	1891.	1892.
Criminal offences	24	33
Smoking and possession of forbidden articles	705	786
Offences relating to work	1,877	2,158
Other offences...	1,262	1,413
Total ...	3,868	4,390

Punishments.

	1891.	1892.
By Criminal Courts	24	33
Solitary confinement	17	27
Reduced diet	42	73
Solitary confinement with reduced diet.	729	529
Other punishments	2,948	3,627
Corporal punishments	108	101
Total ...	3,868	4,390

The attention of the Inspector-General of Prisons should be drawn to the directions of the Government of India communicated to him in paragraph 15 of Government Resolution No. 2159 of the 8th April, 1893, regarding the preparation of statement No. VI, pending the legislation which the Government of India propose to undertake for regulating jail offences and punishments.

6. With regard to paragraph 25 of the report now under review the Inspector-General of Prisons will have observed that, as directed in paragraph 13 of Government Resolution No. 2159 of the 8th April, 1893, Statement No. VII should in future be omitted from the report and the necessary column added to Statement No. II (Judicial); while any information as to the instruction of juveniles should be supplied in the body of the report.

7. Though the number of convict officers of both sexes fell from 559 to 536, it was higher than in the year 1890, and the ratio per cent. to the daily average strength has remained practically the same during the past two years. The conduct of the convict officers again exhibited a falling off, but the duties on which they are employed appear to be more extended than has hitherto been the case.

8. The following table compares the number of under-trial prisoners confined during the year under review in district jails and subordinate jails and lock-ups with those incarcerated in 1891 :—

	1891.	1892.
District Jails.		
Number remaining at close of previous year.	247	204
Number admitted during the year	3,471	3,138
Total ...	3,718	3,342
Subordinate Jails and Lock-ups.		
Number remaining at close of previous year ...	502	485
Number admitted during the year	30,538	30,139
Total ...	31,040	30,624
Grand Total ...	34,758	33,966

There was thus a very substantial decline in the number of under-tria prisoners confined. As compared with one escape from a lock-up in 1891 there occurred no fewer than six from subordinate jails and eleven from lock-ups. No information is given as to the nature of the offence for which the accused who escaped were under trial, nor, except in the case of the six who escaped from subordinate jails, of the result of the endeavours made to recover the escaped prisoners. The number of deaths among under-trial prisoners in all jails and lock-ups increased from 13 in 1891 to 29 in 1892, and of these latter six occurred in the District Jail and four in the lock-up at Shikárpur. The number of convicts (3,518) confined in subordinate jails was slightly in excess of the number in 1891, and of those one died and two escaped.

9. In spite of a decrease in the number of civil prisoners admitted to jail during the year, the average daily strength was higher in 1892 than in 1891. A remarkable decline in the number of civil prisoners has taken place at Ahmedabad, where, as shown by the Inspector-General of Prisons, the number of admissions has declined in the last three years from 320 to 145. With the exception, however, of the Common Jail in Bombay the number of prisoners admitted at Ahmedabad was still the largest in the Presidency, Surat coming next with 130 admissions.

10. Turning now to Statement XII of the report, it appears that the following are the general results of the employment of convicts as compared with the previous year :—

Year.		Average number under sentence of labour.	Sick or infirm.	On unremunerative labour.	On prison duties and jail buildings.	On Manufactures.	On extra-mural labour.
1891...	Number ...	6,697	471	368	2,519	2,074	1,265
	Per cent....	100·	7·	5·5	37·6	31·0	18·9
1892...	Number ...	6,953	509	383	2,567	2,165	1,329
	Per cent....	100·	7·3	5·5	37·	31·1	19·1

The figures show a very slight divergence from those of the previous year. The circumstances which between 1890 and 1891 led to so large a fall in the percentage of prisoners employed on extra-mural labour operated during the year

under review to a certain extent, but the increase, which is very slight, would have been more considerable but for the prevalence of cholera in Thar and Párkar, which temporarily interfered with transfers to the Nára Gang. A large number of prisoners was at work on the new Hyderabad Central Jail, and although, since the close of the year 1892, circumstances have necessitated the temporary diversion of the gang, it is hoped that the expectation of the Inspector-General of Prisons that the Central Jail will be occupied during 1894 may yet be fulfilled. The following table taken from Appendices F, G and H attached to the report shows for the past two years the profits from jail labour exclusive of that devoted to jail buildings and repairs :—

	1891.	1892.
	Rs.	Rs.
Garden profits	2,159	4,136
Factory profits	52,822	49,370
Extra-mural convict labour profit	88,698	64,632
Total ...	1,43,379	1,18,138

These figures differ slightly from the cash realizations shown in paragraph 51 of the report, but they represent the actual profits, whether realized or not, accruing from convict labour. Whichever figures are taken, however, the same features are present. While garden profits, owing to a favourable monsoon, rose by nearly 100 per cent., the profits on extra-mural labour declined by about 29 per cent. The principal causes of the latter decrease were the fact that the earnings of the gang on the Hyderabad Jail had not been adjusted, and that the Nára Gang was, from various causes, chiefly the outbreak of cholera, practically not engaged on remunerative work for one-fourth of the year. The decrease in the profits from carpet manufacture in the Thána Jail, which the Inspector-General of Prisons attributes to the operation of protective legislation in America, alone accounts for the decrease in factory profits for the year 1892. The formation of the Dedargaon Gang and the application of its labour to the Dhulia water-works should, after the necessary initial expenditure on account of construction of barracks has once been adjusted, more than counterbalance by the increase of profits on account of extra-mural labour the diminution in the factory profits in the Dhulia Jail. The cash earnings on account of building and repairing jails and subordinate jails declined from Rs. 5,347 in 1891 to Rs. 5,277 in the year under review.

11. The following tables show the details of manufactures and extra-mural work performed by prisoners in Central and District jails :—

(1).—Manufactures in Central and District Jails.

Year	Average number employed.	Profits.	Profit per Prisoner.
		Rs.	Rs. a. p.
1891	2,074	52,522	25 5 2
1892	2,165	49,370	22 12 10

(2).—Extra-mural work.

Year.	Average number employed.	Profits.	Profit per Prisoner.
		Rs.	Rs. a. p.
1891	1,265	88,698	70 1 10
1892	1,329	64,632	48 8 10

These results are distinctly disappointing, but are fully explained by the circumstances reported by the Inspector-General of Prisons and referred to above. As however under recent orders of the Government of India the occupations of form-printing and other suitable intra-mural manufactures are to be undertaken to the exclusion, except to a limited extent, of the cultivation of food-stuffs required by the prisoners, it is possible that by degrees the profits from intra-mural labour may be increased.

12. Nor do the figures of expenditure, taken from Statements Nos. X and XI, afford more satisfactory reading. Excluding "inspection charges" for each year the total expenditure increased from Rs. 5,23,608 in 1891 to Rs. 5,57,311. Deducting the actual cash realizations, which amounted to Rs. 1,14,314, the total net cost to Government amounted to Rs. 4,52,997 as compared with Rs. 3,77,528. The gross expenditure in all jails and lock-ups is given in the following table:—

	1891.	1892.
	No.	No.
Average number of prioners	7,799	8,022
	Rs. a. p.	Rs. a. p.
Inspection and general superintendence... ...	25,579 0 0	27,369 0 0
Cost per prisoner	3 4 6	3 6 7
Rations	2,11,661 0 0	2,47,582 0 0
Cost per prisoner	27 2 3	30 13 10
Establishment	1,84,247 0 0	1,85,373 0 0
Cost per prisoner	23 10 0	23 1 9
Police guards	37,411 0 0	36,039 0 0
Cost per prisoner	4 12 9	4 7 11
Hospital charges	12,162 0 0	13,544 0 0
Cost per prisoner	1 8 11	1 11 0
Clothing	22,110 0 0	20,445 0 0
Cost per prisoner	2 13 4	2 8 9
Contingencies	56,017 0 0	54,328 0 0
Cost per prisoner	7 2 11	6 12 4
Gross cost of maintenance	5,49,187 0 0	5,84,680 0 0
Cost per prisoner	70 6 8	72 14 2

and the following table gives the net cost:—

	Total Cost of maintenance.	Cost per head.	Cash Earnings.	Earnings per head.	Net Cost to Government.	Net Cost per head.
	Rs.	Rs. a. p.	Rs.	Rs. a. p.	Rs.	Rs. a. p.
Central and District Jails	5,06,963	70 4 8	1,12,702	15 10 0	3,94,261	54 11 0
Subordinate Jails	19,780	69 2 7	1,612	5 10 0	18,168	63 9 0
Lock-ups	30,568	58 5 4	...	...	30,568	58 5 0
Total ...	5,57,311	69 7 7	1,14,314	14 4 0	4,42,997	55 3 0
For 1891	5,23,608	67 2 2	1,46,081	18 12 0	3,77,528	48 6 0
Increase	33,703	2 5 5	...	...	65,469	6 13 0
Decrease	...	...	31,767	4 8 0	...	...

As pointed out by the Inspector-General of Prisons, the general increase in cost, which was almost entirely caused by the increase in the cost of rations, was due to the general rise in the cost of food-grains at the close of the year 1891. This was to be anticipated after the bad season of 1891, and by contrast the cost of victualling convicts after the more favourable monsoon of 1892 should show a marked decrease. Government will await with interest the report on the experiment of storing grain in pits at Dhárwár, which was directed to be undertaken

in paragraph 10 of Government Resolution No. 2997 of the 3rd June, 1891. It is to be regretted that a beginning could not be effected sooner, but the delay is fully explained by the high price of food-grains in the Southern Maratha Country towards the end of 1891. The expenditure under the heads "Clothing" and "Contingencies" shows a decrease, while "Hospital charges" show an increase. The variations are, however, slight and call for no remarks.

13. The following tables, taken from paragraphs 57 and 61 of the body of the report, compare the sickness and mortality amongst convicts and under-trial prisoners in Central and District Jails, and in subordinate jails and lock-ups respectively :—

	1891.			1892.		
	Males.	Females.	Total.	Males.	Females.	Total.
Total population	25,661	1,013	26,674	25,252	1,091	26,343
Daily average strength	6,772	215	6,987	6,975	237	7,212
Number admitted into hospital ...	4,814	111	4,925	5,780	130	5,910
Daily average sick	185·43	4·5	189·93	222·8	4·7	227·5
Number of deaths	236	4	240	271	1	272
Ratio per mille of deaths to total population ...	9·2	3·9	9·0	10·7	0·9	10·3
Do. do. to strength ...	34·8	18·6	34·3	38·8	4·2	37·7
Do. do. to admission into hospital	49·0	36·0	48·7	46·9	7·7	46·0

	1891.						1892.					
	Subordinate Jails.			Lock-ups.			Subordinate Jails.			Lock-ups.		
	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.
Total population	5,826	345	6,171	26,776	1,516	28,292	5,769	337	6,106	26,592	1,444	28,036
Daily average strength	266	13	279	514	19	583	270	16	286	506	18	524
Number admitted into hospital ...	217	9	226	112	6	118	252	22	274	116	11	127
Daily average sick	4·74	0·37	5·11	1·64	0·03	1·67	5·20	0·57	5·86	1·41	0·16	1·57
Number of deaths	2	...	2	11	...	11	6	1	7	14	...	14
Ratio per mille of deaths to total population ...	0·3	...	0·3	0·4	...	0·4	1·0	3·0	1·1	0·5	...	0·5
Do. do. strength ...	7·5	...	7·2	21·4	...	20·6	22·2	62·5	24·5	27·7	...	26·7
Do. do admissions into hospital	9·2	...	8·8	98·2	...	93·2	23·8	45·5	25·5	120·7	...	110·2

It is convenient, as was done in reviewing last year's report, to take the results of the two tables together for purposes of comparison. They work out as follows:—

	1891.	1892.
Average daily strength in all jails and lock-ups	7,799	8,022
Number of admissions to hospital	5,269	6,311
Daily average sick	196·71	234·93
Deaths	253	293

The increase in mortality was mainly due to the appearance of pneumonia in an epidemic form at Shikárpur, where in all 67 deaths occurred. The Inspector-General deals at great length in paragraph 59 of his report with the question of the cause of the unhealthiness of this jail, where, as he shows, the average death-rate for the past 15 years has been 67·5 per mille. The Governor in Council will await with interest the Inspector-General's proposals for removing the district jail from Shikárpur to Sukkur, which can be considered in connection with the general question of the proposed removal of the head-quarters of the district to Sukkur which is now engaging the attention of Government

The frequent changes amongst the Medical officers at this Jail, of which the Inspector-General complains, are to be regretted, but have been unavoidable. They have been due, in the last three years, solely to vacancies caused by well-earned leave, or leave on account of ill-health, or the inability of the Military authorities to comply with the application of the Bombay Government for a Medical officer. The very reason which the Inspector-General of Prisons advances for the retention of a Medical officer at Shikárpur without relief, is that which frequently renders relief necessary and is likely to continue to do so, viz., the unhealthiness of the station.

In the remaining jails the death-rate has been highest at Kaira, where the mortality, however, is apparently due to the generally unhealthy condition of that part of Gujarát consequent on an excessively heavy rainfall.

The Governor in Council fully endorses the appreciation, expressed by the Inspector-General of Prisons, of the strenuous and successful efforts made under the supervision and guidance of Surgeon-Lieutenant-Colonel Salaman to deal with an extraordinary epidemic of fever in the Yerrowda Central Jail. The results of his efforts speak for themselves.

The returns of the remaining jails call for no special remarks, but the Inspector-General of Prisons should be directed to report to Government at an early date the result of the correspondence between the jail authorities at Karáchi and the Municipality on the subject of the drinking water supplied to the jail from the water-works.

It is satisfactory to note the fact referred to in paragraph 60 of Mr. Filgate's report, that during the first two months of this year the number of deaths has only been half that in the same two months of the year 1892.

14. It is presumed that the figures showing the capacity of the various jails have been calculated in the manner indicated in paragraph 13 of Government Resolution No. 3285, dated the 20th June, 1892. It is understood that attention has been paid, in making these returns, to the directions contained in paragraph 3 of letter from the Government of India, No. 478, dated the 11th August, 1892, communicated to the Inspector-General of Prisons with Government Resolution No. 5587, dated the 10th October, 1892.

15. The Governor in Council is glad to notice a very distinct general improvement in the frequency of the attendance of official visitors at the quarterly jail meetings and on other occasions.

16. From whatever point of view the results of the jail administration for the year 1892 be regarded, they must be held to be disappointing. Owing to a bad harvest in 1891 the prices of food-grains, and consequently the cost of maintenance, rose to a very high figure. An unhealthy beginning of the year was made in Sind, and was followed by an almost unprecedentedly unhealthy autumn in Gujarát and parts of the Deccan, brought on by superabundant rains. Sickness amongst convicts also contributed in Sind to diminished returns from jail labour, which were also further decreased by a falling off in demands for the products of jail labour. These results are disheartening enough, but they are due to circumstances beyond the control of the administrators of the jails, and the pages of Mr. Filgate's report show amply that the zeal of the Superintendents of the various jails has in no way diminished. The strenuous efforts of Surgeon-Lieut.-Colonel Salaman during a period of great sickness at the Yerrowda Jail were attended with success, and the arrangements made by Surgeon-Captain Arnim at Shikárpur, thou gh attended with less happy results, are to be commended. Mr. Filgate himself was absent, during the early months of the year under review, attending the Jail Conference at Calcutta, but the amount of inspection performed by him and by Surgeon-Lieut.-Colonel Salaman as Acting Inspector-General was entirely satisfactory. The Governor in Council notices with satisfaction the high opinion expressed by the Inspector-General of Prisons as to the manner in which his Personal Assistant performed his duties during the year under review.

17. Copies of the Report and this Resolution should be forwarded to the Government of India and the Secretary of State, and a copy should be placed on the Editors' Table.

(Signed) C. H. A. HILL,
Under Secretary to Government.

To

The Inspector-General of Prisons,
